

Kids Life Skills - courses 2020

About

'Kids Life Skills' is a non profit organization that aims to give kids ages of 4-10 life skills that are important for the 'Z' generation (and all of us) such as self learning, problem solving and group work / co-operating via coding, understanding of general concepts, through games and adventure. Upscaling and giving the kids a positive technological experience at an early age.

We start the activity focusing on the logic, away from the screen and gradually connect the concepts to actual code, following learning coding we add another layer of connecting the code on the computer to the real world, via plug-ins, wireless connected devices, sensors and robotics. Our courses and activities are fun, engaging, stimulating and integrating hands-on games and activities.

Mission & Vision

When we were young, our parents didn't know which skills we would need growing up. Many of the jobs and opportunities available today didn't even exist 15-20 years ago. We aim to help prepare our children for their future to give them the best odds in an increasingly digital world, constantly changing and evolving, regardless of the professional path they may choose.

Skills like independent thinking and autonomous learning are therefore extremely important because they allow a young person to adapt to the challenges they come across. Coding represents the perfect combination of such fundamental skills, while pushing creativity and co-operation to whole new levels.

2020 Program - REGISTRATION IS NOW OPEN!

Courses 2020:

Ages 4-6 Sundays at 13:00 [Luxembourgish]
Ages 4-6 Sundays at 13:00 [English]
